

Special Issue

Sensors, Systems, and AI for Healthcare

Message from the Guest Editors

The Special Issue focuses on medical applications and wearable and mobile devices with applications in health, including techniques from machine learning, artificial intelligence, Internet of Things (IoT), low-power sensors, and security and privacy for health applications. This includes, but is not limited to, the following topics:

- Wearables and mobile devices in health applications
- Internet of Things (IoT) devices for health applications
- Long-term monitoring and energy efficiency of health sensors
- Machine-learning and artificial intelligence in health applications
- Security and privacy in health applications and wearables

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
