

Special Issue

Cybersecurity and Distributed Computing for IoT

Message from the Guest Editors

The Internet of Things (IoT) has revolutionized modern life by enabling seamless connectivity among devices, systems, and services across various domains, including smart cities, healthcare, industrial automation, and transportation. However, the rapid proliferation of IoT devices has introduced significant challenges related to security, privacy, and scalability. The distributed nature, heterogeneity, and resource constraints of IoT environments make them particularly vulnerable to cyber threats, while traditional security mechanisms often fall short in addressing these evolving risks. This Special Issue aims to bring together cutting-edge research and innovative solutions at the intersection of cybersecurity and distributed computing in IoT. We invite contributions that explore novel architectures, protocols, algorithms, and frameworks, particularly those leveraging edge/fog/cloud computing, machine learning and computational intelligence to enhance the security, efficiency, and resilience of distributed IoT systems.

Guest Editors

Dr. Amna Eleyan
Dr. Mohammed Al-Khalidi
Dr. Umar Raza

Deadline for manuscript submissions

20 February 2027

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
