

Special Issue

Sensor Fusion Techniques for Enhanced Robotic Perception and Control

Message from the Guest Editor

Robotic systems are increasingly deployed in complex, dynamic environments where accurate perception and reliable control are critical. Sensor fusion—the integration of data from multiple, heterogeneous sensors such as cameras, LiDAR, IMUs, and tactile arrays—can significantly enhance our situational awareness by compensating for the limitations of individual sensors. This Special Issue welcomes the submission of original research and review articles on advanced sensor fusion methods that enable robust robotic perception, state estimation, parameter estimation, and system identification. We are particularly interested in contributions that combine classical techniques—such as Kalman filtering, particle filters, and Bayesian inference—with modern machine learning (ML) approaches, including deep learning, probabilistic models, and neural networks. We especially welcome submissions that apply these methods to sensor fusion and/or ML-driven solutions in a broad range of robotic applications, such as autonomous navigation, SLAM, object tracking, adaptive manipulation, and safe human–robot interaction.

Guest Editor

Dr. Madan Mohan Rayaguru

Department of Information Systems & Analytics, Affiliated Faculty at Louisville Automation Research and Robotics Institute (LARRI), University of Louisville, Louisville, KY 40292, USA

Deadline for manuscript submissions

closed (20 January 2026)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
