

Special Issue

Tattoo Sensors

Message from the Guest Editors

This Special Issue invites authors to submit new research results in the area of tattoo sensors. Novel tattoo sensors, successfully conducted with soft materials, stretchable mechanics, thin film electronics, biocompatible designs, and cost-effective manufacturing devices can be addressed. In addition, the use of tattoo sensors combined with other technologies like bio-inspired design, microfluidics, 3D-printing, and nanomaterials are welcome. It also would be excellent if the proposed tattoo sensors are actively used in clinical applications, such as electrophysiological monitoring, optical brain imaging, skin-hydration level sensing, and human-machine interfaces. The main topics include, but are not limited to:

- Bio-patch
- Skin-mountable electronics
- Soft materials and their integration
- Stretchable mechanics
- Biocompatible designs
- Cost-effective manufacturing process
- Clinical applications

Guest Editors

Prof. Dr. Kyung-In Jang

Department of Robotics Engineering, Daegu Gyeongbuk Institute of Science and Technology, Daegu, Republic of Korea

Prof. Dr. Young Min Song

School of Electrical Engineering and Computer Science, Gwangju Institute of Science and Technology, Gwangju 61005, Republic of Korea

Deadline for manuscript submissions

closed (31 January 2019)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
