

# Special Issue

## Advanced Wearable Sensors for Medical Applications

### Message from the Guest Editors

Personalized medicine conveys new, exciting challenges to our research when working with sensors, artificial intelligence, and wearable and smart devices to enhance the existing state of the art in personalized medicine. This Special Issue will address topics related to the delivery of personalized medicine. These span sensory input to diagnostics methods, including, but not limited to, the following:

- Data collection and process with wearables and smart sensors.
- Application of artificial intelligence in medical sensors.
- Intelligent sensors for personalized/precision medicine.
- Image recognition and classification in medical sensing.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
