

Special Issue

Remote Sensing Techniques for Water Quality Monitoring

Message from the Guest Editor

We request your contributions in this field for inclusion in our Special Issue. Research and review articles with respect to the following topics are welcome:

- Satellite monitoring of inland water resources;
- Waterbody delineation from remote sensing imagery;
- Impact of land use/change on water/water quality;
- Remote sensing retrieval of water color/quality parameters;
- Machine learning applications in the remote sensing of the water environment;
- Satellite mapping of aquatic macrophytes in inland water bodies.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
