Special Issue

Ultrasound Measurement and Sensing Technologies

Message from the Guest Editor

Ultrasound measurement is a rather user-friendly method due to its non-invasiveness, portability and real-time imaging capabilities. Ultrasound measurement has found broad appeal across disciplines and applications from sensors for guiding and checking for industrial and non-industrial nondestructive testing to biological, medical, and food industry applications. Ultrasound measurement in standard procedures requires manual operation of the probe based on the interpretation of the image. A robotic system for autonomous ultrasound measurement holds great promise to relieve the workload of operators, yield more standardized imaging results, and find application in harsh environments. This Special Issue aims to highlight advances in ultrasound measurement in robotic sensing systems. Topics include but are not limited to the following:

- Ultrasonic measurement, imaging and visualization.
- Nondestructive testing.
- Robot design, ultrasound robotic sensing and robot control.
- Ultrasound measurement in harsh environments: high/low temperature, pressure, radiation, corrosiveness.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
