Vehicle-to-Everything (V2X) Communications in the 6G Era

Message from the Guest Editors

The advent of 6G technology promises to revolutionize Vehicle-to-Everything (V2X) communications, enabling unprecedented levels of connectivity, safety, and efficiency in transportation systems. This Special Issue aims to explore the latest advancements, technologies, solutions, applications, and new challenges in V2X communications within the context of 6G networks. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
