

Special Issue

Intelligent Industrial Internet of Things: From Theory to Real-World Applications

Message from the Guest Editors

The Intelligent Industrial Internet of Things (IIoT) has enabled industrial sectors to successfully integrate machinery, devices, and sensors with digital systems, networks, and data-driven applications. This Special Issue's main objective is to establish the connection and symmetry between academic teachings and industrial needs in the realm of Intelligent Industrial IIoT by showcasing theory, innovative applications/use-cases, and prospective developments from both an academic and industrial perspective. We invite innovative and original research contributions to cover all aspects of the development and application of the following and related topics, including but not limited to:

- Training methods for Intelligent IIoT;
- Artificial intelligence in IIoT;
- IIoT for intelligent acoustic monitoring;
- Computing on the edge;
- On-device signal processing;
- Cybersecure IIoT domains;
- IIoT for naturalized environments (nature-based solutions);
- Industrial challenges for the IIoT;
- Quantum networks for IIoT domains;
- Data-driven applications for IIoT;
- Intelligent Industrial IIoT for health;
- Web of Things and Intelligent Industrial Internet of Things;

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
