IoT-Enabled Smart City Healthcare: Transforming Healthcare Delivery with Connected Devices

Message from the Guest Editor

Smart sensors and IoT technologies open new doors in healthcare. Transducers, sensors or sensing systems, by means of internet networks, can share data and diagnosis results in a secure and effective manner. This allows, for example, specialists to remotely analyse data and make a diagnosis and patients to monitor his/her own health state. Furthermore, large quantities of data can now be easily shared anonymously for research purposes. In the Smart City context, smart solutions could allow make healthcare more accessible, offering solutions for monitoring health in real time and aiding in decisions regarding hospitalization. This Special Issue aims to collect original research papers and reviews focused on sensors, transducers and sensing devices for healthcare applications based on IoT technologies. It aims to provide a snapshot of the state of the art and progress of applications and technologies, use cases, architectures, recent advances and future trends.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
