Wireless Sensing Applications and Technologies in Electrical Energy Systems

Message from the Guest Editors

The advent of wireless technologies has revolutionized the modern energy system, paving the way for enhanced efficiency, reliability, and sustainability. These technologies, leveraging the power of the Internet of Things (IoT), have transformed the way energy is generated, transmitted, distributed, and consumed. Wireless sensors, with their ability to monitor, control, and communicate, play an important role in this sector. For example, wireless IoT devices allow real-time monitoring of energy generation and consumption, enabling predictive maintenance and ensuring optimal operation of energy systems. Despite these significant benefits, the implementation of wireless sensing technologies presents challenges. These include issues related to sensor network design, data security, and the energy efficiency of the sensors themselves. Addressing these challenges requires ongoing research and development efforts. For more information, please visit mdpi.com/si/MW4Z9

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
