

## Special Issue

# Advanced Sensing Systems for Structural Monitoring and Damage Identification of Buildings and Bridges

### Message from the Guest Editor

In this Special Issue, 'Advanced Sensing Systems for Structural Monitoring and Damage Identification of Bridges and Buildings', we welcome recent experimental research and cases studies on structural health monitoring and damage identification data analysis to detect specific targets. Topics of interest include, but are not limited to:

- Advanced sensing technologies and networks for structural health monitoring and damage identification.
- Innovative non-destructive evaluation of civil infrastructures.
- Remote sensing techniques for structural health monitoring and damage identification.
- Smart materials for structural dynamics characterization and damage detection.
- Monitoring tools and techniques for current and historical structures and infrastructures.
- Cure monitoring and early-age concrete damage identification.
- Structural health monitoring using artificial intelligence and machine learning.
- Innovative neural network architecture for structural health monitoring.
- Information modeling/bridge information modeling integrated with structural health monitoring systems and methodologies.

---

### Guest Editor

Prof. Dr. Costas P. Providakis  
Applied Mechanics & Strength of Materials Lab, School of Architecture,  
Technical University of Crete, 73100 Chania, Greece

---

### Deadline for manuscript submissions

closed (31 October 2025)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
