

Special Issue

VOC Sensors Applicable to IoT and Healthcare

Message from the Guest Editors

Many IoT sensors are deployed already as commercial products; however, the vast majority of these sensors are associated with physical parameters, such as temperature, motion or pressure sensing. This Special Issue is focused toward gas sensors both wearable and handheld that will provide a pathway to valuable diagnostic data sets for human health. Particular interest lies in the detection of volatile organic compounds (VOC) by the sensor or analyser. This Special Issue welcomes both reviews and original research articles on the current progress of new gas sensor technology, analysis method, human gas specimen collection methods, and interpretation of the sensor data. The recent advancement of gas sensors and array of microsensors enables highly sensitive and selective VOC detection for new applications of human health.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
