

## Special Issue

# Research on Sensing Technology in Extreme Environment

### Message from the Guest Editor

In the fields of aviation, aerospace, nuclear power and oil exploration, sensors and detection technologies under extreme environments such as high temperature, high pressure and strong electromagnetic interference are key technologies to ensure the safe operation of relevant equipment in these fields. In these extreme environments, strain, pressure, acceleration, temperature and other parameters need to be detected. The latest sensing technology used to detect these parameters detection can effectively promote the improvement of detection levels in relevant fields. Therefore, the aim of this Special Issue is to collect original research and review articles regarding the latest progress, technologies, solutions, applications and new challenges under extreme environmental conditions.

- optical fiber sensor technology
- physical sensors
- industrial applications of sensors
- sensing technology under high temperatures and high pressure
- sensing technology under strong electromagnetic interference
- optical sensing technology through fluid

---

### Guest Editor

Prof. Dr. Ning Wang

Key Laboratory of Optoelectronic Technology and Systems of the Ministry of Education of China, Chongqing University, Chongqing, China

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
