

## Special Issue

# Wireless Body Area Networks for Health Applications

### Message from the Guest Editors

Advanced solutions for personal health management, including patients' health monitoring and risk prediction systems, rely on new technologies for providing trustable measuring and data communications from the data source to the medical health control centre. WBAN play a key role in this context. The main focus of this SI is personalized medicine: remote monitoring of patients via the adoption of innovative sensors solutions, including implantable sensors, wearable sensors, and sensors and devices for remote diagnosis and for chronic diseases and co-morbidities analysis. Moreover, efficient algorithms for data pre-processing within the sensors, and power optimization strategies and communication mechanisms for the collection of data from sensors (in-body communications) and their transmission to the cloud (out-body communications), are some of main topics of this SI. All these topics aim to make the healthcare processes more effective, focusing on various theoretical and experimental views on the WBAN applications, technologies and utilizations based on extended versions of best-evaluated papers from Bodynets 2019, as well as quality papers from open call.

### Guest Editors

Dr. Lorenzo Mucchi

Dr. Matti Hämäläinen

Dr. Massimiliano Pierobon

Dr. Diep Nguyen

Prof. Dr. Giancarlo Fortino

### Deadline for manuscript submissions

closed (30 April 2020)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
