Enhancing the Cultural Heritage Experience for People with Disabilities

Message from the Guest Editors

Cultural heritage (CH) sites play a crucial role in preserving and disseminating cultural knowledge for all visitors. They should ensure accessibility to provide inclusive experiences, allowing individuals with disabilities to fully enjoy and participate equally in their cultural rights. Visiting CH sites is challenging for people with disabilities, who make up only about 7% of visitors. Therefore, this Special Issue focusses on research related to methods, tools, and techniques to design and develop accessible cultural heritage experiences for people with disabilities. More specifically, we seek papers that describe research that relates to technological solutions that support visitors with visual, motor, dexterity, hearing, and cognitive impairments. The focus is on technologies that provide meaningful and engaging CH experiences, enabling independent visitors through the use of smart environments and mobile applications with customized interfaces adapted to the characteristics of various groups of people with special needs.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
