Special Issue

Wearable Sensors for Biomechanical Gait Analysis

Message from the Guest Editors

Sensors journal entitled "Wearable Sensors for Biomechanical Gait Analysis" will focus on all aspects of research and development related to these areas. This Special Issue focuses on the development, validity, use, and applicability of wearable devices in biomechanical gait pattern identification. The broader aim is to collect high-quality papers from researchers around the world working in this area to make biomechanical gait monitoring more widespread and more effective using wearable technologies.

Deadline for manuscript submissions closed (28 May 2021)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
