Recent Trends of Wearable Sensors for Biomechanics Analysis and Physiological State Function Assessment

Message from the Guest Editors

In recent years, the use of smart devices in research and clinical applications has dramatically increased. In particular, wearable sensors are an object of growing attention in the scientific community since they allow for long-term recording of a wide range of biological signals; Besides, they have a high degree of user acceptance. Moreover, wearable devices favour the development of measurement protocols and procedures focused on daily living activities, with current efforts being diverted towards the remote monitoring of physical activities, the detection of potentially dangerous domestic events. On the other hand, wearable devices can have many different sensors and measurement technologies. However, the spread of this technology and the increasing number of potentially available raw data require novel processing and mining techniques for extracting reliable information necessary for the different fields where wearable sensors and smart devices find their applications. This Special Issue aims to collect articles dealing with novel applications of wearable sensors and advances in signals acquisition and processing for fields related to human movement and physical monitoring.

Guest Editors

Dr. Alessandro Mengarelli

Dr. Federica Verdini

Dr. Andrea Tigrini

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
