

Special Issue

Wearable Sensors for Health and Physiological Monitoring

Message from the Guest Editors

Dear colleagues, In this Special Issue, we want to build a bridge between different scientific disciplines and offer highly innovative researchers in various fields a platform to exchange research in this exciting and emerging field: wearable sensors for health and physiological monitoring. We, the guest editors of this Special Issue, represent research backgrounds in geographic information science, mobility research, and medicine with a focus on cardiovascular medicine and sports science. We herewith stand for the highly interdisciplinary approach that is essential in research in this emerging scientific field and highly anticipate submissions from a broad range of specialities to this Special Issue. For detailed information, please visit [here](#).

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
