Wireless Sensor Networks in Industrial Applications

Message from the Guest Editor

The Wireless Sensors/actuators (actors) Networks (WSNs) support several important and critical applications areas, the most important of which is probably the critical real-time industrial/factory applications domain. The rapid evolution of the WSNs technologies and the increasing smartness of instrumentation are leading the industrial sector to evolve and reach the industry 4.0 era. This Special Issue will provide an opportunity for researchers to publish their original achievements related to the above mentioned aspects which characterize the real-time industrial WSNs as a whole.

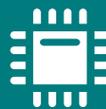

Guest Editor

Prof. Dr. Stavros Koubias

Department of Electrical and Computer Engineering, University of Patras, Patras, Greece

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
