

Special Issue

Wearable Sensors for Healthcare Applications

Message from the Guest Editor

With more and more commercially available sensing devices on the market, there is a huge opportunity to leverage sensor data specifically in the field of healthcare for clinical decision support applications. For this Special Issue of *Sensors*, we seek original or review manuscripts that focus on Wearable Sensors for Healthcare Applications (WSHA). We aim to provide a top-quality journal for scientists and engineers to present their latest research findings in this rapidly changing field. Topics of interest include sensor technology and application, Internet of Things, signal processing, data fusion, and deep learning in sensor systems

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
