

Special Issue

Application of Wearables in Digital Medicine

Message from the Guest Editors

This Special Issue will gather novel developments in the use of wearable sensors for digital medicine and particularly efforts to validate their use in human subjects. Studies that highlight novel hardware and/or methodological developments, validation of these approaches in human subjects, and systematic reviews of the literature in a particular subarea of digital medicine are encouraged. Approaches that discuss approaches for collecting and analyzing multi-modal data are of particular interest. Where appropriate, we strongly encourage authors to deposit their source code and data in a public repository (e.g., GitHub) to help accelerate progress in this field. Topics include but are not limited to the following topics. Topics:

- Wearable sensors
- Sensor fusion algorithms
- Machine learning applied to wearable sensor data
- Multi-modal sensing
- Digital biomarkers
- Digital phenotypes
- Mental health
- Neurological disorders
- Physical rehabilitation
- Older adults
- Digital medicine

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
