

Special Issue

Advances of Wearables in Health Monitoring

Message from the Guest Editor

This Special Issue is devoted to exploring new approaches, solutions and applications in wearable sensors and electronics for health monitoring applications. We welcome contributions of original research papers, as well as comprehensive reviews (subject to editorial pre-approval), focusing on wearable sensors and devices for health monitoring. Submissions should address certain issues in wearables for health monitoring, which might include, but are not limited to, the following topics:

- Wearable electrochemical sensors
- Wearable optical sensors
- Wearable self-powered biosensors
- Wearable materials
- Textile-based sensors
- Wearable sweat sensors
- Wearables for vital signs monitoring
- Wearables for personalized and preventive medicine
- Wearables for drug delivery
- Biosensors and chemical sensors for continuous health monitoring

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
