

## Special Issue

# Biosensors for Biomedical, Environmental and Food Applications

### Message from the Guest Editor

This Special Issue aims to collect the latest advancements in biosensor technologies across the biomedical, environmental, and food sectors. As the demand for rapid, accurate, and portable detection systems grows, biosensors have emerged as transformative tools for real-time monitoring, diagnostics, and quality control. This Special Issue seeks to bring together cutting-edge research that explores novel biosensor designs, innovative materials, and signal transduction mechanisms. In the biomedical domain, we welcome studies that focus on point-of-care diagnostics, disease biomarker detection, and personalized health monitoring. For environmental applications, submissions addressing pollution detection, water quality assessment, and ecological monitoring are encouraged. In the food industry, we aim to feature research on contamination detection, freshness assessment, and food authentication.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
