Intelligent Sensors and Advanced Computing: Developments in the Era of Industry 4.0

Message from the Guest Editors

The authors of selected papers presented at the 12th IEEE International Conference on Intelligent Data Acquisition and Advanced Computing Systems: Technology and Applications (IDAACS'2023) are invited to submit significantly revised and extended versions to this Special Issue. Contributions from other researchers also working in this area of critical interest are very welcome.

- intelligent sensors
- data acquisition
- advanced computing systems
- information processing
- wireless sensor networks
- Internet of Things

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
