Special Issue

Data Processing, Privacy and Security Challenges for Fog and Cloud Computing in the Internet of Things

Message from the Guest Editors

In the Internet of Things (IoT) landscape, the interplay between fog and cloud computing creates a mutually beneficial yet complex relationship. This complexity arises from Fog computing decentralizing data handling, bringing it closer to the IoT devices at the network's edge. This proximity cuts down on latency and conserves bandwidth, facilitating instantaneous analytics and decisions on a local scale—essential for applications like smart healthcare, smart cities. Nonetheless, this decentralization heightens concerns over privacy and security, such as data privacy and integrity, and unauthorized intrusions. Therefore, without adequately addressing security and privacy concerns, the benefits of fog and cloud computing in IoT cannot be fully realized. This Special Issue therefore aims to put together original research on data processing, privacy and security challenges for Fog and Cloud Computing in IoT.

- Quality of Service (QoS) for IoT.
- Interoperability solutions for IoT.
- Distributed storage solutions for IoT.
- Threat Detection, authentication for IoT.
- Privacy enhancing techniques for IoT.
- Trustworthy computing for IoT.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
