

Special Issue

Advances in Big Data and Internet of Things

Message from the Guest Editors

The rapid advancement and widespread penetration of mobile networks, web-based information creation and sharing, and software-defined networking technology have enabled the sensing, prediction, and control of the physical world with information technology. Every business process can be empowered, and therefore, various industries have redesigned their business models and processes along the Internet of Things (IoT) paradigm. The main purpose of this Special Issue is to provide an international platform for presenting and publishing the latest scientific research outcomes related to the topics of big data and the internet of things.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
