Intelligent Sensors and Artificial Intelligence in Building

Message from the Guest Editors

Smart building is an important component in the progress of constructing smart city and smart city 4.0. Based on the remote sensing information supported by intelligent sensors, various artificial intelligence (AI) technologies such as deep learning, edge computing, smart blockchain, have been deeply involved in the full life-cycle management of intelligent building, greatly improving the comfort, safety and humanization of modern building. Potential topics include but are not limited to:

- Non-contact, non-intrusive building environment perception technology.
- Intelligent devices and instruments for smart building.
- IoT applications with intelligent sensors in building.
- AI-assisted building decision making.
- AI-based energy consumption prediction of building.
- Intelligent security monitoring and building facility fault diagnosis.
- Building information modeling (BIM) with AI.
- Cutting-edge AI technologies for full life-cycle management of building

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
