Surface-Enhanced Raman Spectroscopy Sensors and Their Applications

Message from the Guest Editor

This Special Issue aims to showcase cutting-edge research on the development, optimization, and application of SERS sensors. By bringing together experts from multidisciplinary fields, this collection of articles will contribute towards the advancement of SERS technology, facilitating its widespread adoption and empowering scientists and engineers to harness its potential across various domains.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
