

Special Issue

AIoT for Building Construction and Maintenance Engineering

Message from the Guest Editors

This Special Issue on AIoT for building construction and maintenance engineering is timely and important, as it will provide a platform for researchers and practitioners to share their latest findings, technologies, and solutions in this field. The issue will cover a wide range of topics related to AIoT in architecture, engineering, construction, operation, and maintenance industry.

Potential research topics include but are not limited to:

- AIoT-enabled supply chain management in the construction industry;
- AIoT-based safety management and quality management at construction sites;
- AIoT solutions for energy-efficient building management;
- Smart sensors and actuators for building automation and control;
- AIoT-powered maintenance for building systems;
- AIoT-driven data analysis for construction and maintenance optimization;
- Distributed AIoT systems in the construction industry;
- Advanced AI algorithms for smart construction and intelligence maintenance;
- BIM/CIM and AIoT data fusion;
- Digital twins and AIoT integration.

Guest Editors

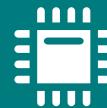

Dr. Xincong Yang

Prof. Dr. Xiaochun Luo

Dr. Zezhou Wu

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
