

## Special Issue

# Last Trends in Acoustic Sensing

### Message from the Guest Editor

The aim of this special issue is to provide the latest findings of the current research in Acoustic Sensors, special addressing the improvements in the sensors design and technology fields, for innovative application in gas and liquid ambient. Authors are invited to present the advanced research trends in acoustic wave sensors technology for operation under extreme conditions (high temperature, high pressure, and caustic ambient). The Special Issue will publish those full research, review and high rated manuscripts addressing the advances in design, fabrication, modeling, testing and characterization of cost-effective, small and high performance acoustic wave sensors.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
