

## Special Issue

# Advanced Signal Processing and Human-Machine Interface for Healthcare Diagnostics and Bioengineering Applications

### Message from the Guest Editors

The objective of this Special Issue is to bring together innovative techniques and computer models for use in biomedical signals and medical image analysis. Explicitly, we aim to explore unique contributions that: (1) advance machine learning models to be used in bio-signal processing and medical image analysis for HMI models; (2) design novel bio-signal processes for healthcare applications; (3) contain reviews of recent developments in this field; and (4) contain the creation of standard datasets. We look forward to receiving your papers! Best regards,

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
