

Topical Collection

Advanced Techniques for Acquisition and Sensing

Message from the Collection Editors

Recent advances in electronics and sensing technologies have enabled the development of innovative methods and instruments which integrate acquisition, processing, storage, and communication capabilities. New acquisition systems and intelligent sensing devices can perform onboard computations, but they require proper techniques to reduce the data rate while retaining the information content, to optimize the use of available power resources and channel capacity. This Topical Collection aims to promote research that explores new frontiers and challenges in techniques for data acquisition and sensing, as well as the related measurement issues. Papers presenting innovative works, case studies, and reviews of the state-of-the-art are invited. Best regards,

Collection Editors

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
