

## Special Issue

# Application of Motion Sensing Systems in Physical Activity and Sport

### Message from the Guest Editors

The development of motion sensors enables the analysis of physiological, technical, and tactical behavior in physical activity and sport. The development and democratization of the use of sensors such as inertial motion units during the last decade have caused major changes in sport sciences as well as in health-related physical activity studies, which have undergone a great evolution as a consequence of motion analysis possibilities. At present, we can find a comprehensive use of sensors in physical-activity-related research: from sport medicine and rehabilitation to training and conditioning, health-related physical activity studies, physical education, and notational analysis. This Special Issue is intended to become a comprehensive collection of useful state-of-the-art research studies. We will collect basic and applied research studies, tutorials, reviews, and position papers that address the use of motion sensors in physical activity and sport sciences. We will accept high-quality, original, unpublished papers that are not currently under review by any other journal or conference.

### Guest Editors

Prof. Dr. Ernesto De La Cruz-Sánchez

Prof. Dr. José Pino Ortega

Prof. Dr. Sebastian Feu

### Deadline for manuscript submissions

closed (10 September 2022)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
