Advances in Antenna and Sensors System

Message from the Guest Editors

With the advent of new communication technologies such as 5G and 6G and the Internet of Things (IoT and M-to-M), the needs for the development of new, connected, embedded systems have increased. Among these needs, we can identify the development of new architectures of connected sensors. Indeed, sensors that were formerly used as a simple module in a circuit and that allowed measuring a particular physical quantity have today become fully fledged autonomous systems integrating intelligent functionalities of monitoring, self-calibration, and even decision making. Furthermore, antennas, which are essential components of any wireless communication system, require adaptation for these new architectures and these new communication technologies. Therefore, new antennas incorporating features such as multiple input and multiple output (MIMO), beamforming, and beam steering capabilities need to be developed.

- IoT architectures;
- Antenna for sensors;
- Antenna for IoTs and M-to-M;
- Embedded antennas;
- Mmwave antenna;
- Antenna for 5G and 6G;
- Reconfigurable antennas.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
