

## Special Issue

# Biomarkers and Nanosensors: New Approaches for Biology and Medicine

### Message from the Guest Editors

In the past decade, biomarker research has experienced phenomenal growth powered by novel molecular readout (nano) technology in genomics, proteomics and metabolomics. The biological markers of disease are now enabling many new and innovative applications in the field of medicine, molecular biology and biotechnology. This special issue will focus on convergence of biomarkers and nanotechnology based molecular readout systems and clinical applications.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
