Building Sensors

Message from the Guest Editors

Building sensors are the subject of research for this Special Issue. For this Special Issue, scientifically-based methods using high-tech technical means are considered as a subject of research corresponding to the fundamental use of the capabilities of microprocessor devices. The specified subject of research correlates with the modern concept, which is a set of tasks for the design and operation of materials and structures that are not taken into account in classical approaches in the production of materials and building products. Best regards,

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
