

## Special Issue

# Integrated Circuits and Systems for Smart Sensors

### Message from the Guest Editor

Smart sensors function as intelligent detectors of temperature, humidity, light, image, pressure, speed, acceleration, displacement, rotation, gas, ultrasound, flow, magnetic force, current, voltage, and so on. They are increasingly used in industries with various applications which require intelligent operations, such as medical, health care, automobile, manufacture, agriculture, military, environment, and security. Smart sensors not only consist of a sensing element, but also a digital converter, such as an analog-to-digital converter, a time-to-digital converter, and a frequency-to-digital converter; a digital signal processing block for canceling noise, compensating mismatch, offset, and bias, and calibrating nonlinear distortion; an energy harvester block for generating the power from heat, light, vibration, thermal difference, and electromagnetic waves; and a power management block for providing and distributing the appropriate power to the overall system. Thus, integrated circuits and systems play a key role in developing and delivering smart sensors. For more information, please click: [mdpi.com/si/115595](https://mdpi.com/si/115595)

### Guest Editor

Prof. Dr. Sangjin Byun

Division of Electronics and Electrical Engineering, Dongguk University, Seoul 04620, Korea

### Deadline for manuscript submissions

closed (20 February 2023)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
