

Special Issue

Smart Sensor Networks for Civil Infrastructure Monitoring

Message from the Guest Editors

Civil infrastructures that make up urban and rural communities, such as bridges, buildings, roads, railways, dams and levees, ports, transmission towers, etc., serve under continuous operational and environmental stresses and, sometimes, extreme hazardous loads, leading to deterioration and damage. Smart sensor networks play a critical role in monitoring the civil infrastructures through intelligent sensing, processing and data transmission to support essential decision makings aimed at detection, diagnosis and prognosis of infrastructure health conditions. The objective of this Special Issue is to generate discussions on the latest advances in smart sensor networks for civil infrastructure health monitoring, algorithm development and applications. Topics of interest include, but are not limited to:

- Novel-sensor-empowered sensor networks
- Intelligent networking and operations
- Signal processing and algorithms for damage diagnosis and health prognosis
- Smart SHM system integration
- Control-oriented smart sensor networks
- Adaptive sampling and interrogation
- Integration of sensor network data within digital twins
- Dense sensor networks
- Field demonstration and applications

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
