

## Special Issue

# Performance Analysis in Wireless Communication with RIS

### Message from the Guest Editors

Reconfigurable intelligent surfaces (RISs) have drawn significant attention due to their capability to tailor electromagnetic waves across a wide frequency range, from microwaves to visible light. RIS technology has several promising future applications in wireless networks and has attracted growing interest due to its advantages. This Special Issue aims to collect innovative contributions concerning RISs' various applications in wireless communications and networks. Topics of interest include, but are not limited to:

- Wireless communications
- Wireless networks
- Performance analysis
- Intelligent reflecting surfaces
- Digital communication systems.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro  
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
