Communication in Networks of Unmanned Aerial Vehicles (UAVs)

Message from the Guest Editors

Unmanned aerial vehicles (UAVs) have entered many fields of application, such as disaster management, search and rescue, localization and mapping, structural inspection, transportation and delivery of goods, pollution and radiation monitoring, precision farming, etc. In recent years, research has intensified on networks of UAVs (or, UAV swarms) and, consequently, on enabling the autonomous and collaborative behavior of UAV swarms, e.g., for autonomous simultaneous localization and mapping, navigation, and reconstruction. An important building block in that endeavor is to provide high performance and robust wireless communication capabilities among UAVs (air-to-air) and to/from ground stations or sensors (air-to-ground). This Special Issue is devoted to reporting novel scientific ideas, approaches, results, and (prototype) solutions/applications on communication in UAV swarms and with ground entities. For more information, please visit mdpi.com/si/31779.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
