Special Issue

Communications and Computing in Sensor Network

Message from the Guest Editor

Sensor networks are changing the way people interact and integrate with advanced technologies. While up to a decade ago, sensor networks were essentially considered in the field of industrial applications and video surveillance, exploiting the classic wired and radio transmission technologies, the currently available technologies make it possible to extend their application to different areas. This scenario is often referred to as the Internet of Things, but this name may refer to extremely different scenarios in terms of scale, bandwidth, applications, technological level, social impact, transmission techniques and energy efficiency. This Special Issue aims to collect valuable contributions in order to create a comprehensive picture of the current state of processing and communication techniques in the existing socioeconomic sectors. The Special Issue may also include different themes and technologies related to communications and computing in sensor networks. For more invitation, please visit mdpi.com/si/34412.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
