# Sensors and Data Analytic Applications for Smart Cities

### Message from the Guest Editors

We have proposed this Special Issue, titled “Sensors and Data Analytic Applications for Smart Cities”. Under this title, we expect high-quality unpublished papers focused on the design and use of new sensor and actuators architectures combined with data analytics applications for smart cities and smart communities, which include, but are not limited to, the following topics:

- Advanced measurement infrastructures for utility companies (energy, water, gas, etc.)
- Data analytics and machine learning applications for smart city
- Urban assets management; smart street lighting, smart waste, etc
- Mobility services; smart mobility, smart parking, smart traffic, etc
- Citizen services; smart government, smart information platforms, e-health, etc
- Smart home and smart buildings monitoring and management
- Environmental monitoring
- Smart city platforms; IoT, edge computing, cloud computing inter-operability
- Communication protocols, standard and cybersecurity in smart cities
