# **Special Issue**

### Recent Advances in Data Mining and Information Fusion in Wireless Sensors Networks

### Message from the Guest Editor

Emerging applications, such as the smart meters, smart city and smart grids, are based on wireless sensor networks, where a large number of sensors and Internet-connected devices generate a huge quantity and complex datasets. Data complexity arises from several factors, such as the conditions under which the sensors are deployed, procurement with different sensors at different periods, frequencies or resolutions, These factors often render the collected dataset to be uncertain and imprecise. As robust knowledge extraction and information fusion are indispensable to the success of these emerging applications, issues associated with automatically extracting useful information from large, uncertain and imprecise sensorgenerated datasets must be addressed before the full benefits of the smart applications can be achieved. For further information, please visit http://www.mdpi.com/ journal/sensors/special\_issues/data\_mining. Prof. Dr. Jemal H. Abawajy

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

#### Editor-in-Chief

#### Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
