

Special Issue

Disruptive Technologies and Wireless Sensor Network Communication Algorithms

Message from the Guest Editors

The advancement of 5G, embedded, and sensor technologies has resulted in the rapid development of many services and applications. This Special Issue aims to represent the most recent advances in disruptive and sensor technology for business and industrial applications. We welcome contributions in all areas of communication and networks, including sensors, embedded systems, multimedia (AR, VR, MR), IoT, IoM, smart and automation systems, including automation systems, signal processing algorithms, and new or disruptive applications. These include, but are not limited to:

- 5G and next generation networks
- wireless sensor and networks
- disruption technology and algorithms
- deep learning
- smart grid and smart systems

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
