

## Special Issue

# Sensors and Methods for Dynamic Measurement

### Message from the Guest Editors

In dynamic measurement, the measurand varies during the observation time, and the investigation of such variations is the main goal. This is the object of increasing attention today, due to its application importance and to the scientific and technological challenges it poses. Main current investigation topics include:

- New or improved sensors or measuring principles;
- Dynamic calibration, shock testing;
- Methods for improving the quality of the results (dynamic compensation, filtering) and for uncertainty evaluation;
- Methods for highlighting the useful information (spectrum analysis, parametrical identification, modal analysis);
- Dynamic assessment in social sciences;
- Special application areas, such as vibrations and vibro-acoustics, biomechanics of human movement, full-scale monitoring of civil structures, aerodynamics and wind tunnel testing, unsteady fluid dynamics, image-based measurements.

### Guest Editors

Prof. Dr. Giovanni Battista Rossi

Dipartimento di ingegneria meccanica, energetica, gestionale e dei trasporti, Università degli Studi di Genova, Genoa I-16145, Italy

Prof. Dr. Luigi Carassale

Dipartimento di ingegneria meccanica, energetica, gestionale e dei trasporti, Università degli Studi di Genova, I-16145 Genoa, Italy

### Deadline for manuscript submissions

closed (31 March 2022)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
