

Special Issue

E-health Sensor Systems and Platforms for Biomedical Challenges

Message from the Guest Editors

Health systems are facing disrupting situations (limited resources, aging population, chronicity, pandemic scenarios, etc.) that threaten traditional functioning and procedures, requiring novel models of healthcare delivery to provide a timely response to the increasing demands of citizens. This Special Issue aims at collecting advances, proposals, and solutions based on sensors, systems, and e-Health platforms for the management and supervised monitoring of any kind of patient in any biomedical situation. We invite authors to submit their research results and share their experiences based on technology proposals, system implementations, and use cases, as well as review articles. For more information, please visit: mdpi.com/si/67163

Guest Editors

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
