

Special Issue

Advanced Sensor Modules for ISO/IEC Compliant Emerging Robots

Message from the Guest Editors

In this Special Issue, papers focus on the emerging regulations and the development and integration of new sensors, sensor systems and sensor modules to be used in new scenarios for the robots to be able to achieve the design goals. Practical experimental results are particularly encouraged, as are papers setting advances in the wider context of international standards. **Keywords:**

- Robot Performance Measuring Sensor and Sensor System
- Sensory issues related to Robotic Safety
- International Standards
 - Robot Terminology and Characteristics
 - Service Robot Safety
 - Medical Robot Safety and Essential Performance
 - Collaborative Industrial Robot Safety
 - Performance of Service Robot
 - Modularity for Robotics
- Sensors, Sensor Systems and Sensor Modules
- Service robot applications
- ISO and IEC requirements
- Safety-related situations
- Security-related situations
- Performance assessment
- Inter-operability

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
