Special Issue

Advances in Energy Materials for Sensing Applications

Message from the Guest Editor

Energy materials are particular materials that can participate in energy conversion or storage and provide the required energy, such as electrochemical materials, photovoltaic materials, and piezoelectric materials. Energy materials for sensors can convert light, thermal energy, mechanical energy, etc., in nature into electrical or other energy to produce signals and/or supply power for the sensing system. The aim of this Special Issue is to present high-quality original research articles, methods, opinions, perspectives, and reviews on the frontiers of energy materials for sensor applications. Original contributions from both academia and industry are welcome. Topics may include, but are not limited to:

- The design, synthesis, and characterization of energy materials for sensing applications, including piezoelectric materials, electrochemical materials, photovoltaic materials, etc;
- Manufacturing techniques of sensors or sensing applications;
- Testing and application of sensors;
- Advanced sensing technologies.

Kind regards, Prof. Dr. Hui Wang

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
