

Special Issue

Electrochemical Sensors and Biosensors for Rapid Trace Analysis of Pollutants and Contaminants

Message from the Guest Editors

This Special Issue focuses on trace analysis of pollutants and contaminants such as heavy metals, pesticides, and pharmaceuticals by using novel mercury-free electrode materials. Characterization of mercury-free electrode materials by using ASV techniques in combination with square-wave (SW) and differential pulse (DP) excitation stripping signals will be of high interest although other electrochemical techniques not involving a preconcentration step are equally welcome. Articles presenting working electrode characterization by electrochemical impedance spectroscopy (EIS) and surface analytical techniques (e.g. AFM, XPS, and ToF-SIMS) will also be considered for publication. The combination of electrochemical analysis with real sample preparation methodology is highly encouraged, nevertheless, review articles providing information on state of the art developments of the proposed scientific fields will likewise be accepted. For more information, please click: mdpi.com/si/52146.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
